Dec 5 Waterville Airport Meeting- 7:00 pm

Dave Begin with his latest “Tamecat trainer”!

### **K V M A Meeting Minutes for 10-3-2018**

The meeting was called to order at 7:00 PM with 10 members present. The minutes of the last meeting were accepted as published in the newsletter.

The treasurers report was accepted as read by the treasurer.

**Under old business;** The swap-meet at the Waterville Airport was a good time, but there were a few glitches. Changes will be made, if the event happens next year. Rollie reminded members that the club will need a new newsletter editor for 2019.

**Under new business;** October 6th, 14th and 28th will be the last float flies at Ron Gregory's camp on Pattee's Pond. The 28th will be a pull in the dock, and close up camp day. Able bodied members are welcome!!! Bob Chapman is looking into lawn mower repairs this winter. It looks like a law has been passed that prohibits all RC aircraft from flying higher than 400'.

Meeting adjourned at 7:26 PM.

Minutes submitted by Wayne White (secretary)

### September 29 Float Fly Pattee's Pond

I arrived about 7:20 and Ron was already getting the camp ready for the day. We got the boat into the water and the motor warmed up and I took a couple of photos of the beautiful foliage and fog! Pretty! Shortly after, I made a flight with my Jupiter Duck. Still a bit foggy but no issues. Roland arrived with two planes that were ready for their maiden flights on floats, the E-flite Beaver and E-flite Super Cub. About that time, Ron had to leave for the day. Chris arrived with his Maule and Cessna 150 and David came with his 150. I flew my Seamaster II and Polaris. I had brought the Aventura Twin but forgotten the canopy! Back into the truck with that plane! All of us made flights until the winds arrived shortly after 10:00. Only time we needed the boat was when the hatch blew off David's 150 so we had to rescue that. After putting the planes away and securing the boat, we started lunch just before 11:00 and were on our way home by noon. Another nice day at the pond!

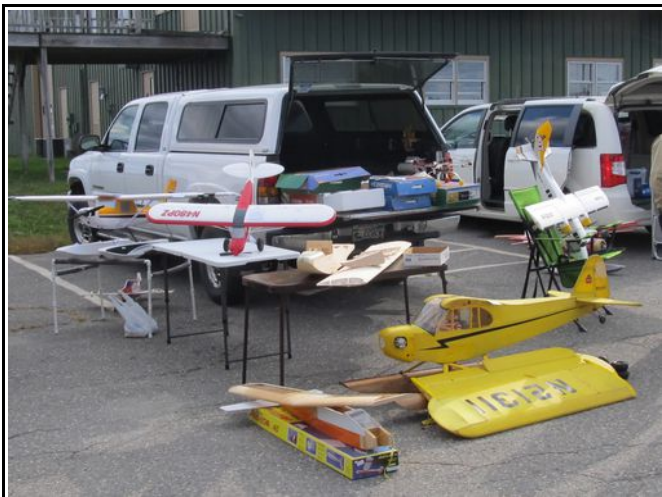

Thanks, Ron, for the use of the camp.

There was a lot of flying this day, but the camera crew decided to just fly and not take many pictures!

### Swap Meeting September 30 at the Waterville Airport

This was our first swap meet at this site. It was pretty well attended, would like to see more!  
Some changes though will be made for the next time we have another swap meet!

### Oct. 6 Float Fly at Pattee's Pond

Got there a little earlier than usual and brought the gas and life preserver down and got the boat in the water and motor running, Joe Gilbert got there shortly after me and got his planes ready to fly. Had his Twin Adventure, his new plane from Bob the Bush Mule that has reverse thrust built in, that was fun to see working on taxiing out. Of course he also has his Polaris, and Jupiter Duck, Roland Woodworth came out early also with his Cessna 150. Later, Bob Chapman showed up with his FMS Beaver. And after that Wayne White showed up with his Cessna 170. I had my Tidewater and tried to get it up but had a problem which turned out to be the motor mount came loose from the POD, made it back with no damage to the plane. Since it was a little chilly we had the fireplace going and it was great to warm up especially hands after flying. The winds came up a little after we had been flying for a while. We stopped to eat about 11 AM and Bob and Wayne did the honors of cooking. After lunch the wind had gone down and Bob and Joe did a little more flying! It turned out to be a chilly start with a good finish to the day.

Ron

### Oct. 14 Float Fly at Pattee's Pone

Got to camp about 7:20 AM, temp about 35 degrees but had left the fire going from Sat. evening so was comfortable in the camp. Got the gas and life preservers out of the shed and launched the boat and started the motor for rescues which were not required. Joe Gilbert showed up while I was in the boat. Joe and I went in the camp to warm up a little and Ruslan Reiter showed up and came in to check out float flying. Next Larry showed up with his Carbon Z cub. Then Roland Woodworth showed up with his camera ready. Chris Townsend than showed up with his Maule ready to go. About 8:45 we started bring equipment down to the shore line and Joe got his Bush Mule in the air for a flight. Than Larry got his Carbon Z Cub in the air for a flight. Shortly after that the wind came up and we all went up for camp flying. About 10:30 we decided that the wind was still too high and Joe got out the onions and we ended moving the Bar B Q to a location with no wind, Than Joe took on the cooking and Roland the Rolls. After lunch, Chris decided the wind had gone down enough to try a flight but again a burst of wind came up and ended a flight, but he gave it a good try. We called it quits about noon and although Ruslan didn't get to fly, he said he will be back to try again in two weeks.

Ron

**Membership/Renewal Application**

Name:  
Date of Birth (Youth Only):  
Street Address:

Town/City:  
State:            Zip:

Telephone:  
AMA #:

**NOTE:** If you do not have your AMA number yet, please indicate the date applied here and report number to Treasurer as soon as possible:            Date Applied to AMA:
